

Ownership Services 	Description
Pricing Services	Owners can save, track, and monitor trends of Items.
Insurance	Owners can request and obtain approval to insure Items. Based on Item verification and appraisals, appreciate can speed up the adjudication process for customers to receive insurance on their Items.
Financial Services & Credit	Owners can access credit based on the value of their Items.
Repair	Owners can spend less time searching for repair services and improve the longevity of the Items they own.
Marketplace	Owners can access a secondary marketplace of verified Items which they can buy, sell, and trade in a trusted manner. Sellers can make sales more quickly, and buyers enjoy a reduced risk of purchasing counterfeit goods.
VAT	Owners can request VAT back on Items purchased outside of their taxable home country, reducing the time they spend processing VAT and receiving a refund.
Verifiable Credentials (VCs)	Items can have verifiable credentials (VCs) issued and verified for different attestations regarding associated details.
Blockchain Services	<p>Blockchain gateway services support interoperability with blockchains (e.g. Ethereum).</p> <p>A transaction signer with elevated security will enable approval of custodial wallet transactions.</p> <p>Some of the supported blockchains also will include services to monitor transactions (potentially enable recovery for a stuck transaction)</p> <p>Additionally, a distributed file system gateway supports interoperability with distributed file systems, including support for long-term persistence (e.g., IPFS with Infura)</p> <p>NFT managers mint and verify NFTs on specific blockchains(i.e. mint Ethereum non-fungible tokens (NFT)⁶)</p>
