Infrastructure and Integration

```
Service Coverage Service {
  rpc RegisterProduct (RegisterRequest)
    returns (RegisterResponse);
}

message Register Request {
  ...
}

message Register Response {
  ...
}
```

Choose an appreciate defined interface

```
function registerProduct(registerRequest) {
  ...
}
```

Create implementation

Partners + Third Party

```
FROM appreciate/node:latest
...
ENTRYPOINT node ./bin/start
```

Generate an image

API Integration —— Register service

```
$ curl -X POST https://registry.appreciate.it/
register --data '{ \
    "image": "registry.docker.io/coverage-
provider/appreciate-service:latest" \
  }'
```
